

# What Goes Where

a Ruby on Rails cheat sheet by Amy Hoy

## app/

---

- apis/ ← xml-rpc API support
- controllers/ ← controllers mm, business logic
- helpers/ ← view helpers down with HTML!
- models/ ← db models are just super
- views/ ← html views make things purty
- layouts/ ← page designs one for each controller
- controllername/ ← action deisgns one for each method

## public/

---

- 404.html ← 404 duh
- 500.html ← 500 sorry, service unavailable
- images/ ← pics g-rated or otherwise
- javascripts/ ← scripts for the kiddie in all of us
- stylesheets/ ← css cuz you be stylin'

## components/

---

all your components are belong to us

## test/

---

coming soon
