

Symfony

Form Events

Symfony 2.1

Form Events

FormEvents::PRE_SET_DATA
FormEvents::POST_SET_DATA
FormEvents::PRE_BIND
FormEvents::BIND
FormEvents::POST_BIND

Data Prepopulation

PRE_SET_DATA

form.pre_set_data

Before populating the default values (before setData method)

E.g.
Dependent fields

POST_SET_DATA

form.post_set_data

After populating the default values (after setData method)

```
$inventor = new Inventor();
$inventor->fullName = "Nikola";
$form->setData($inventor);
```

Full Name

Data Submission

Before data is bound to the form

E.g.
Add/remove fields

PRE_BIND

form.pre_bind

Full Name

```
$form->bind($request);
```

After data is bound to the form

E.g.
Validation

BIND

form.bind

When data is bound to the form

POST_BIND

form.post_bind

```
$builder->get('fullName')->addEventSubscriber(
    FormEvents::BIND,
    function(FormEvent $event){
        $event->setData(ucfirst($event->getData()));
    }
);
```

E.g.

Nikola Tesla

Deprecated since Symfony 2.1:
BIND_CLIENT_DATA
BIND_NORM_DATA
SET_DATA
